

Coaxial Assemblies

INTRODUCTION

The next generation of Armored WorkHorse® coaxial assemblies is a proven and cost effective group of test assemblies. These ruggedized test cables were specifically designed for use in high volume production environments, where strenuous flexing and numerous mating cycles quickly destroy typical connectors and attachment methods.

Carlisle Interconnect Technologies' (CarlisleIT) new Armored WorkHorse® assemblies are ideal replacements for OEM test port cables due to their long life and repeatable performance. Armored WorkHorse® assemblies utilize CarlisleIT's proven "544" triple shielded and "564" double shielded cables. Using a solid center conductor, these cables have excellent phase stability with flexure and performance up to 18 GHz.

FEATURES

- » DC to 18 GHz
- » Durable construction and attachment method
- » Crush-resistant spiral stainless steel armor
- » Phase stable with flexure for testing repeatability
- » "544" triple shielded and "564" double shielded for reduced leakage
- » RoHS compliant

How to Order

1) Choose your product from the table below:

Armored WorkHorse® Cable Information						
Cable Code	Cable Type	Jacket Type	Center Conductor	Max. Frequency	Max. Insertion Loss (dB p/ft.)	Return Loss @ Max Freq.
06	564	FEP	Solid SPCW	6 GHz	0.85	-20.0 dB
18	544	FEP	Solid SPCW	18 GHz	0.73	-20.0 dB

2) Choose your connector codes from the table below:

Series	Type N	SMA
Plug	18	36

3) Choose your length in inches from the table below:

Length in Inches									
18	20	24	30	36	40	48	60	72	80

4) Build your assembly part number:

WHE XX-XX XX-XXX

Frequency in GHz. Choose from "06" or "18" or depending on the chosen cable

Connector A. Choose from the connector codes shown above

Connector B. Choose from the connector codes shown above

Length in Inches (i.e. 036 for 36" or 120 for 120")

**Note: the smaller digit code for Connector A and B will be listed first (e.g. WHE18-1836-036, not WHE18-3618-036)*
